ABOUT ME

Main interests: Computer science, math, physics, video games, modelling, art, philosophy. I love acquiring deep knowledge, uncovering fundamental laws of systems and exploring unique ideas.
I've been developing games for more than 6 years now, both solo and on small teams. I'm highly collaborative and productive.

WORK EXPERIENCE

[20/07/2023 – Current]

Game Developer

Pimlico Tech LTD

City: London | **Country:** United Kingdom

Developing a middle-sized RPG called Godslain: The Crimson Toll.

Developed and published two mobile games: OctoCombat and Goblin War Camp.

Also working on a 1v1 combat game that will be released on Steam.

PROJECTS

[05/06/2022 – Current]

Cockroach Engine

A game engine for 2D platformers completely developed by me with C++ and OpenGL. It features a batch renderer that can render millions of sprites, a particle system, a rich level editor and more.

[25/05/2024 – 07/06/2024]

PBR Renderer

A physically based renderer with directional and point light shadows, skybox reflections, normal/depth/parallax mapping and more. Made with C++ and OpenGL.

[26/07/2024 – 02/08/2024]

Nanovox

A high performance voxel renderer using C++ and OpenGL. It streams multiple chunks asynchronously via multithreading. It also does the entire rendering on the GPU side with instancing, which results in incredible performance.
